## CAREER OBJECTIVE

---

Aspiring web developer with a strong foundation in front-end and back-end technologies, passionate about building responsive, user-centric web applications. Looking for a challenging role where I can contribute to innovative projects, enhance user experience, and grow as a full-stack developer leveraging my skills in HTML, CSS, JavaScript, React, and back-end frameworks like Node.js and Spring Boot.

## Education

---

|                                                                       |                      |
|-----------------------------------------------------------------------|----------------------|
| <b>Chandigarh University</b> , BE in Computer Science and Engineering | Aug 2021 – May 2025  |
| • GPA: 8.09/10                                                        |                      |
| <b>Sri Chaitanya Junior College</b> , MPC                             | June 2019 – May 2021 |
| • Score: 982/1000                                                     |                      |
| <b>Pragathi Central School</b> , 10th Standard                        | June 2018 – May 2019 |
| • GPA: 9.3/10                                                         |                      |

## Internship Experience

---

|                                                                                                                                                                                                                    |                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>Full stack developer Intern</b> , CIGI Technologies                                                                                                                                                             | Dec 2024 – Present 2025 |
| • Designed and optimized interactive web components with React.js, resulting in a 40% decrease in load times and a notable improvement in user satisfaction scores, as evidenced by a 15% increase in app ratings. |                         |
| • Reusable UI components built and integrated with a scalable back-end API, improving data flow and performance.                                                                                                   |                         |

## Publications

---
